Report of the Event

Title : Application of NDT in Automobile Industry

Resource Person : Mr. ARUNRAJ, B.E

Total Participants : 54

"Application of NDT in Automobile Industry" was organized by Training and Placement Cell on 13.09.2022 for all department students.

Mr. G. Gopal Event coordinator of Mechanical Engineering delivered the welcome address and she extended her warm welcome to the resource person and participants.

And then the resource person noted the various ways in Non-Destructive Testing (NDT) plays a critical role in the automobile industry for ensuring the safety, reliability, and quality of vehicles. NDT techniques like ultrasonic testing (UT) and radiographic testing (RT) are used to inspect welds in automotive components such as chassis, frames, and exhaust systems to detect defects like cracks, porosity, and incomplete fusion. Techniques like eddy current testing (ECT) and magnetic particle testing (MPT) are employed to assess the properties of materials used in critical automotive components like engine parts, axles, and gears, ensuring they meet required specifications. Visual testing (VT) and dye penetrant testing (PT) are used to detect surface defects such as scratches, pits, and corrosion in automotive body panels, wheels, and other exterior components. NDT methods like radiographic testing (RT) and computed tomography (CT) are utilized to inspect internal structures of components like engine blocks, transmission housings, and suspension parts to identify defects such as voids, inclusions, and internal cracks.

The participation Certificate has been awarded to the participants

Mr. G. Gopal gave excellent awareness about "Application of NDT in Automobile Industry" of its various real time applications.

Report of the Event

Title : Hands-on Training on IOT & Its Tools
Resource Person : Dr. M. PALLIKONDA RAJASEKARAN, B.E., M.E., Ph.D.
Total Participants : 54

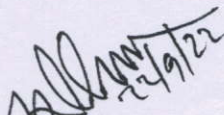

"Hands-on Training on IOT & Its Tools" was organized by Training and Placement Cell on 19.09.2022 for all department students.

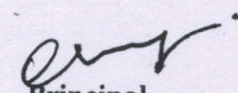

Mr.S.Dhinesh Event coordinator of Computer Science & Engineering delivered the welcome address and she extended her warm welcome to the resource person and participants.

And then the resource person noted the various ways in Hands-on training on IOT (Internet of Things) and its tools would involve practical exercises and projects to familiarize participants with IOT concepts, technologies, and tools. Introduction to IOT - Define IOT and its significance in connecting devices, collecting data, and enabling smart applications. Discuss real-world examples and applications of IOT across various industries. They are able to know the architecture of IOT systems, including sensors, actuators, IOT gateways, communication protocols, cloud platforms, and applications. Introduce IOT hardware components such as microcontrollers, sensors, and communication modules. IOT Protocols and Communication. Explore common IOT communication protocols, including MQTT, COAP, HTTP, and Web Socket. Set up and configure communication between IOT devices and cloud platforms.

The participation Certificate has been awarded to the participants

Mr.S.Dhinesh gave excellent awareness about "Hands-on Training on IOT & Its Tools" of its various real time applications.
