EVENT REPORT

DATE: 06.05.2023

Tree Plantation Program conducted by NSS students of CMS Engineering College, Namakkal, at Manikattipudhur is a significant initiative aimed at educating and encouraging people to protect and care for the environment. In today's world, human behaviour has a profound impact on the environment, making it essential to understand and address these effects.

Tree Plantation is crucial for recognizing the importance of our natural surroundings, the challenges they face, and the actions we can take to mitigate negative impacts. It involves understanding the socio-economic activities that harm the environment and finding ways to remedy these effects.

Despite the environment's natural resilience, human activities in recent decades have made it increasingly fragile. Therefore, conserving the environment is not just an altruistic act but also essential for securing our future on this planet. Environmental awareness aligns with the principles of environmentalism, which advocates for human responsibility in preserving the environment from anthropogenic damage.

Movements like "Go Green" and others promote environmental awareness in various sectors. Being environmentally aware means identifying environmental problems and actively addressing them as a community. This program aims to instill a sense of accountability and proactive engagement in students and the broader community, fostering a collective effort to protect our planet.

The efforts of the NSS students to raise environmental awareness will hopefully inspire positive changes and promote sustainable practices within the community.

EVENT REPORT

DATE: 21.04.2023

Our students conducted a tobacco-free awareness program in our college on April 19th, 2023. The student's volunteers had visited many public places in Namakkal and created awareness of the usage of tobacco and how to stop the tobacco conservation slogans and posters near the taps in public places and in water purifiers used there. This had a great reach among those people in that area and got a good response.

Commit to Quit

Quitting can be challenging, especially with the added social and economic stress that has come as a result of the pandemic, but there are a lot of reasons to quit.

Worldwide, around 780 million people say they want to quit, but only 30% of them have access to the tools that can help them do so. Together with partners, WHO will provide people with the tools and resources they need to make a successful quit attempt. The smokers were more likely to develop severe diseases.

EVENT REPORT

DATE: 06.04.2023

The abuse of alcohol and drugs has resulted in significant morbidity and mortality among adolescents worldwide. Many of these youth will lose their lives to drugs and alcohol and a significant number are likely to grow up to become problem drug users. Although, the substance abuse problem is complex and large in magnitude, there is a substantial amount of evidence-based research available to physicians, community leaders and schools to implement interventions that can decrease adolescent substance abuse rates. Because this issue is not peculiar to any one community or culture, we recognize that individual interventions may not be universally effective. Therefore, we emphasize the NIDA strategy of targeting modifiable risk factors and enhancing protective factors through family, school and community prevention programmes, as a generalized framework for healthcare and community activists to use when researching programmes and strategies best suited for their own community.

Under the guidance of Inspector, sub inspector, Our Chairman and Principal, 50 NSS Volunteers and NSS program Officers took the pledge to avoid the use of drug and marched from CMS Campus to Police station, Velagoundampatty.

EVENT REPORT

DATE: 28.03.2023

Dengue fever has become a threat to the country, especially during the rainy seasons. In order to facilitate the curbing of this disease, 25 students of NSS at CMS College of Engineering, Namakkal, were involved in a dengue prevention activity. The students were instructed to identify places within the campus where Aedes mosquitoes were likely to breed. They were provided with disposable gloves, masks, and disinfectants. The students screened the campus for stagnant water and tried to eliminate it. They emptied and removed empty cartons and containers filled with water. They also sprinkled disinfectants on the ground and in places where complete removal of cartons was not possible. They made sure that the disinfectants (bleaching powder) were not sprinkled in regions where fish and other aquatic animals would be affected. The students gathered together after completing their tasks and shared their experiences. They also practiced for a skit program to be performed for the college community to create awareness about the prevention of dengue. The reports presented by the group members involved in the activity are enclosed, along with a few representative photographs.

A proverb says, "Health is wealth." On March 25, 2023, the 'DENGU Awareness Campaign' raised awareness about health issues. In this event, they explained about communicable and non-communicable diseases. The main cause of DENGU is mosquito hatching. How to limit mosquito breeding was explained to the public.

EVENT REPORT

DATE: 25.02.2023

It's everyone's responsibility to keep themselves and their surroundings clean and hygienic. It also brings good and positive thoughts into the mind, which slows down the occurrence of diseases. On February 14, 2023, the NSS volunteers from CMS College of Engineering organized a temple cleaning program at Namakkal. A total of 40 NSS volunteers took part in the event. The volunteers cleaned the entire temple and collected all the trash in large disposal bags. At the end of the program, the volunteers were instructed to wash their hands with soap. Volunteers were provided with refreshment.

EVENT REPORT

DATE: 27.01.2023

On January 25, 2023, a successful voting awareness rally was organized in Namakkal by the NSS unit, CMS College of Engineering. The event was aimed at promoting voter education and encouraging eligible residents to register to vote ahead of the upcoming local and national elections. The theme of this event is "Nothing like voting; I vote for sure." The program was organized by the NSS Unit of CMS Engineering College in collaboration with CMS Polytechnic College. The event saw a large turnout, with residents of all ages and backgrounds coming together to learn about the importance of voting and the election process.

EVENT REPORT

DATE: 27.12.2022

The awareness program on Road Safety Rally was conducted by NSS students of CMS Engineering College, Namakkal. The NSS students are creating awareness about road safety through the prevention of road accidents by obeying the road safety rules and regulations. The most important factor in road safety is the need for skilled and cautious driving so that passengers, pedestrians, and drivers stay safe. Developing better roads is also important to avoid road accidents.

Anyone walking down a road or driving on a two-wheeler or four-wheeler vehicle is to be alert. It is a very common scenario when we can spot almost every other person on the road busy with his or her smart phones. This is not only the case with pedestrians, but we can very often spot people driving cars or riding motorcycles, busy on their phones, too. When all their attention is on their smart phones, they become less aware of their surroundings. This is highly risky and may lead to fatal accidents. Hence, whenever we are walking or driving on the road, we must not be engrossed in our smart phones.

Road safety does not only imply crossing the road through zebra crossing, but it also addresses the safety of those driving through the narrow roads of hilly areas and of those driving late nights on the highways. Some ill practices, like drinking and driving, have led to numerous road accidents in these areas. There are certain speed limits specified for particular areas to reduce the chance of accidents. It is of utmost importance to abide by the speed limits of a particular area as per the traffic rules.

Sometimes, fatal accidents occur in hilly areas due to fog, whereas sometimes it is the carelessness of the drivers that leads to road accidents. People barely maintain the speed limits on the road when they are in a hurry. At times, those who drive trucks or trucks carrying commodities in bulk overnight meet with accidents. Due to sleepiness, they may miss important road signs. Also, there are several cases of road accidents that are caused by the poor condition of the roads.

EVENT REPORT

DATE: 16.12.2022

Temple is a very sacred place for worship, and this place has to be remaining sacred. Therefore, the proper cleaning and care should be done on regular basis. Our students collectively joined the motion of Temple Cleaning at Manikattipudur which was organized by CMS College of Engineering. They explained the road-map of the programme, a day before the event. The event was organized on 15th December morning (15.12.2022) around 11:00AM. Students left from CMS campus by bus which is nearly 4.5 kilometres and reached there around 11.30AM. Cutting tools and other equipment's were already arranged by one of the students the night before the event. They collected all the garden tools and reached near temple. After that without wasting time they divided themselves into four teams. Volunteers worked and made the temple area clean and green.

The students had really worked hard in the programme.

EVENT REPORT

DATE: 24.11.2022

Organizing a blood donation camp to raise awareness among students is a noble initiative. Blood donation indeed saves lives, and every donation can make a significant difference, especially for patients in critical need.

The positive effects experienced by donors, such as a sense of satisfaction, highlight the personal fulfilment that comes from helping others in need. By encouraging more students to donate blood, you're not only saving lives but also fostering a culture of empathy and altruism in the community.

Such camps play a crucial role in bridging the gap between blood supply and demand. They also help dispel myths and fears surrounding blood donation, making more people comfortable with the idea of donating blood regularly.

Overall, your efforts are commendable, and they contribute significantly to the well-being of society. Keep up the good work, and may your endeavours inspire others to join this noble cause!

EVENT REPORT

DATE: 15.10.2022

The awareness program on plastic pollution conducted by NSS students of CMS College of Engineering, Namakkal, is a commendable initiative. It's crucial to educate communities about the harmful effects of plastic pollution, especially in villages like Thindamangalam. Plastic pollution is a significant environmental issue with wide-ranging impacts, including on human health, wildlife, and the overall ecosystem.

Plastics not only persist in the environment but also break down into smaller particles, called micro plastics, which can enter the food chain and have been found in human organs and even in unborn babies' placentas. Additionally, the chemicals present in plastic packaging, such as phthalates and BPA, can leach into food and beverages, posing health risks.

While recycling is important, it's not a complete solution to the problem. Most recycled plastics are down cycled into lower-quality products, which are less likely to be recycled again. Therefore, reducing plastic consumption and finding alternative materials are key steps in addressing the plastic pollution crisis.

It's heartening to see young people taking the lead in raising awareness and driving change. Their efforts can inspire others to take action and contribute to a cleaner, healthier environment for all.

EVENT REPORT

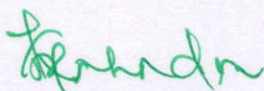

DATE: 09.08.2022

With a day left for the Valvil Ori Festival at Kolli Hills, a mass cleaning campaign was carried out by students and officials. Over 42 students collected plastic materials and other waste dumped along the road from the foot hills at Karavalli to Semmedu Kolli Hills. A large number of liquor bottles were removed from the roadsides.
